PROFESSIONAL SUMMARY

Python Full-Stack Developer with 2 years of experience architecting **scalable, data-intensive platforms** for real-time processing and analytics. Proven ability to build **end-to-end web systems** using Django, React, and modern data tools. Currently augmenting expertise with **hands-on Machine Learning projects** to bridge robust system architecture with intelligent, data-driven applications.

TECHNICAL SKILLS

- **Backend & Data Engineering:** Python, Django, Django REST Framework, WebSockets, Celery/RabbitMQ, Data Processing, API Design
- **AI/ML & Data Science:** Machine Learning, **scikit-learn**, Pandas, NumPy, Matplotlib, Jupyter, Model Training & Evaluation
- **Databases:** PostgreSQL, Redis, MySQL, Database Optimization
- **Frontend:** JavaScript, React, HTML5, CSS3, Bootstrap
- **DevOps & Infrastructure:** Nginx, Git, Linux,
- **Cybersecurity Concepts:** Data Pipeline Security, Secure API Design, MITRE ATT&CK Framework

PROFESSIONAL EXPERIENCE

CRAW SECURITY – Saket, South Delhi, Delhi

Python Developer (Full Stack Web) • 2024 – 2025

- **Led development of a microservices-based SIEM/XDR platform (Shield XDR)**, architecting the system for **high-volume, real-time data ingestion and processing** from distributed agents.
- **Owned 50%+ of codebase**, developing critical backend services with **Django REST & WebSockets** and frontend components with **React**, establishing a foundation for real-time analytics.
- **Engineered secure, low-latency data pipelines** for log collection and normalization, ensuring reliable flow for continuous threat detection and alerting.
- **Integrated structured analytics frameworks (MITRE ATT&CK, YARA)** into alerting pipelines to transform raw telemetry into actionable security insights

PROJECTS & INITIATIVES

1. **Shield XDR – Security Information & Event Management (SIEM/XDR) ~ CRAW Security**
A full featured SIEM/XDR platform for real-time detection and response
Tech Stack: Python, Django, DRF, PostgreSQL, Redis, RabbitMQ, WebSocket, Bootstrap, MITRE ATT&CK, YARA Rules
2. **Crack The Lab – Capture The Flag (CTF) Platform ~ CRAW Security (Dec 2024 – Jan 2025)**
Interactive CTF platform used at IIT Jodhpur for a live cybersecurity event
Tech Stack: Django, MySQL, HTMX, OAuth, Bootstrap, WebSocket, Nginx
3. **Housing Price Prediction | Machine Learning Project :**
A Regression Model ,predicts Prices of house
Tech Stack: NumPy, Pandas, Matplotlib, Sci-Kit Learn, Jupyter

EDUCATION

Indira Gandhi National Open University (IGNOU) – New Delhi

Bachelor of Computer Applications (BCA) – *Pursuing, 2023 – 2026*

SOFT SKILLS

- Analytical Thinking
 - Adaptability
 - Time Management
 - Growth Mindset
 - Team Collaboration
 - Communication
-

ACHIEVEMENTS

- Built and deployed real-world CTF platform used by IIT Jodhpur in live event
 - Promoted to lead developer on Shield XDR within months of joining Crow Security
 - Regularly selected to conduct technical interviews for new candidates
 - Mentored over 100 students in Python programming
-

CERTIFICATIONS

- MySQL basics and Advanced ~ ITVedant 2024
- Python Programming ~ ITVedant 2024
- Web Designing ~ ITVedant 2024
- Python Programming ~ IBM 2024
- Django Framework ~ ITVedant 2024
